Discover Italy through the eyes of cinema.

Italy for Movies is not just for industry professionals, it is also for film tourists, because often it is cinema that inspires trips to places made famous as the setting for popular films and works of fiction. The portal allows you to discover which works were filmed in various areas, with detailed information on locations chosen for scenes, and to view set photos or behind-the-scenes videos. This is an increasingly popular way to discover a marvelous and lesser-known Italy, rich in cultural and natural treasures which shine equally bright on the screen and in real life.
